Treat Yourself to a Profound Non-Surgical Facelift!

If you've noticed more fine lines, wrinkles, and sagging skin, then the Profound skin tightening treatment procedure is for you! Profound laser treatment helps to **recover lost skin resiliency** by stimulating new bursts of hyaluronic acid, elastin, and collagen inside the skin. These essential components **provide you with tighter, smoother, more youthful skin**. As we age, **we lose collagen and elastin in our skin**. **Profound helps the body stimulate what we have lost**.

Profound's minimally invasive process, allows you to recover fully, within 3-5 days of treatment! As we age, we all lose collagen and elastin in our skin. Profound helps the body stimulate what we have lost. You'll be able to **tighten loose skin and improve your appearance without having surgery or using toxins or fillers**. Profound laser treatment can **tighten skin on your face, stomach, legs, arms**, and works on all skin types.
